War Games Specialist

S-Thunder was formed by a group of industrial designers, engineers, manufacturers and marketers who are also war game hobbyists.

LAUNCH OF HIGH END TACTICAL WAR TRAINING PRODUCT LINE AT AFFORDABLE PRICES

Utilizing new patent registered designs to improve performance

S-Thunder Limited (S-Thunder) is pleased to announce the worldwide launch of its tactical paintball & airsoft product line for,

- Outdoor / Indoor War Games / CQB / MilSim / Woodsball / Scenario
- Film / Entertainment Production
- Military / Police / SWAT / Tactical Training / Riot Control

S-Thunder offers high quality & durable paintball and airsoft products at low entry prices. Our product line is designed, engineered and manufactured at S-Thunder's manufacturing facility in Hong Kong and the manufacturing savings are passed to our customers.

S-Thunder was formed by a group of industrial designers, engineers, manufacturers and marketers who are also war game hobbyists. During their years as players, they also became skilled in modifying and enhancing the performance and accuracy of war games airsoft equipment and accessories that included paintball markers, airsoft and Airsoft Electric Guns (AEG). S-Thunder started as an Original Equipment Manufacturer (OEM) for high end airsoft guns. After extensive experience in manufacturing airsoft guns for well known brands, S-Thunder's engineering team came upon the realization that most war game equipment utilizes engineering and designs that are considered evolutionary years ago, but are no longer state of the art by today's engineering standards and innovations. With this knowledge, S-Thunder developed all new designs, engineering and manufacturing methods that are now patent pending and will be applied to a new line of war game equipment. Before S-Thunder's product line launch, some products have already been purchased and rebranded by other airsoft brands and some of these products have been sold to end users such as the military and police forces. All S-Thunder products are simple in design, easy to maintain out performs most products currently available in the market.

Our introductory products include a replica M4 Carbine 43 caliber (11mm) paintball marker with similar weight, dimensions and feel to the genuine rifle. S-Thunder's paintball marker functions with similar trigger pull / choking effort and is able to fire 3 paintballs per second as per the real rifle. More powerful 290+ fps marker, 350+ fps marker for military / police as well as waterproof / rustproof versions and AK-47, sniper rifle and double barrel shotgun markers will be available. Our paintball markers utilize S-Thunder's design patents for,

- minimizing gas usage (shoots 30 - 40 paintballs per 12g CO₂ cartridge for 210+ fps version)
- shooting accuracy (bottom spin rotation of the paintball)

Our Airsoft landmines are designed for durability and multiple use. S-Thunder pressure activated landmines either shoot water or smoke powder with an exploding sound. A pressure release (ie foot release) landmine which can be used with water or smoke powder will soon be available along with other types of landmines and bombs.

Our Airsoft grenades are able to shoot BB Pellets, Smoke Powder, Paintballs, Powder Balls and Pepper Balls with a loud exploding sound and adaptable with all grenade launchers in the market. Other types of gas grenades and launchers will become available in the coming months. Our CO₂ gas accessories have been extensively tested and able to contain CO₂ charges for several months. S-Thunder created special rubber compound for the O-rings to prevent gas leakage as current O-rings available within the marketplace deform due to the extensive CO₂ temperature and pressure variations

Yu-Hon Li, Director - Business Development makes special note that "with Airsoft World's recent awarding of the exclusive distribution rights to KWA's line of high-end airsoft guns throughout the United Kingdom and due to the fact Airsoft World will be actively marketing themselves, the KWA line and its many other product lines to dealers in the UK and throughout Europe, S-Thunder are sure to gain a side benefit from Airsoft World's efforts in broadening its exposure and service to new and current dealers. Furthermore, we feel S-Thunder is a complimentary 'professional line' to KWA's whereby Airsoft World will offer a highly beneficial one-stop-shop of high quality airsoft guns, landmines and grenades to dealers in the United Kingdom and beyond its borders.."

S-Thunder is proud to include Evike.com in its growing distribution network offering S-Thunder's complete product line of airsoft grenades, landmines and paintball markers in the United States. Evike.com has a strong and increasing presence in the North American marketplace and S-Thunder is proud to associate themselves with Evike.com.
